

About Westlake

Westlake (NYSE: WLK) is a global diversified industrial company that manufactures and supplies essential products that enhance the daily lives of people around the globe. Our products, now under a “One Westlake” brand, supply the necessary building blocks for everyday products across the housing and infrastructure, packaging and healthcare, and automotive and consumer goods markets. Consumers gain the benefits of materials Westlake produces in products such as food packaging, medical devices, soaps and detergents, car interiors, fashion, toys, shoes, furniture, electronics, siding, stone veneer, windows, outdoor living, roofing, and pipe & fittings. Westlake is proud to contribute to driving a sustainable future through the creation of essential products that are Enhancing your life every day®.

Westlake Performance & Essential Materials

The Westlake Performance & Essential Materials segment includes our polyethylene and vinyl chemicals production, which are vital to the manufacturing of polymers to protect food, medical and personal products, and an extensive range of sectors and spaces, such as automotive interiors and exteriors, building materials, PVC pipes for agriculture, water systems and buildings, detergents, pharmaceuticals and many more vital applications. The business units in this segment include: **Westlake North American Vinyls; Westlake North American Chlor-alkali & Derivatives; Westlake European & Asian Chlorovinyls; Westlake Olefins; Westlake Polyethylene; and Westlake Epoxy**, which produces coatings and composites used in many of the same industries noted above.

Westlake Housing & Infrastructure Products

Businesses in the Westlake Housing & Infrastructure Products segment produce finished goods and key materials, including building products, pipe & fittings and custom compounds. Products created by **Westlake Royal Building Products** are critical to the manufacturing of items including residential siding, architectural stone, roofing, windows and outdoor living. **Westlake Global Compounds** manufactures PVC compounds, which are used in wire and cable, disposable medical devices, consumer products, vinyl records, wallpaper, pool liners, vinyl records, automotive applications, stationery, insulation tapes, medical care labels and graphics. As the second largest PVC pipe manufacturer in North America, **Westlake Pipe & Fittings** offers an extensive range of PVC pipe & Fittings – from rubber gasketed to solvent weld to restrained joint – used in crucial applications, such as municipal water and sewer, residential plumbing, water wells, mining, and agricultural and turf irrigation. **Westlake Dimex** uses post-industrial recycled polymers in the manufacture of compounds to make garden edging, home and office floor mats, and marine-dock edging.

Employing approximately 16,000 employees, Westlake operates worldwide. Our mission is to serve our customers by safely and reliably providing quality and sustainable products and services that enhance people's lives every day. Westlake works to align the interests of our global customers and suppliers with those of our shareholders, employees and the communities in which we operate.
