

Our Approach to Sustainability

At Westlake, we prioritize being a good corporate citizen and providing innovative solutions that enhance life every day. For us, this means being true to our company's longstanding values as we continue the journey toward achieving a more sustainable future. As a global manufacturer that provides everyday essential materials for billions of people around the world, we are innovating solutions, working with our local communities and playing an active role to address modern-day environmental and societal challenges.

Proactive Environmental Site Footprint

To further reduce our carbon footprint, we are allocating capital to both proven and emerging technologies, including product and operational innovations. This includes:

- Energy-efficient projects
- Adding hydrogen as a fuel source
- Continuous operational improvements
- Increasing use of less carbon-intensive energy providers

Working to Align

TASK FORCE ON CLIMATE-RELATED FINANCIAL DISCLOSURES

Carbon Goal
Westlake established a major climate goal: a 20% reduction in our Scope 1 and Scope 2 CO₂e emissions per ton of production by 2030 from a 2016 baseline.

Water Goal
Continue water-reduction efforts and introduce a water management program at water stressed and other relevant sites by 2030.

Community Engagement Goal
Sponsor a community outreach event annually at each of our global operations in alignment with our core value of citizenship.

Health & Safety Goal
Achieve zero accidents and zero injuries. We strive to achieve this every day.

Diversity & Inclusion Goal
Achieve racial, ethnic and gender representation that reflects the diversity of the communities in which we operate.

Circular Economy Goal
Continue to expand our participation in recycling and sustainable products.

Sustainable
Products

Recycled products made with renewable energy, recycled material or bio-based content. We provide product innovation in:

Consumer Goods

Westlake Dimex: One of the largest recyclers of industrial PVC and a leading manufacturer of sustainability oriented consumer products made from PIR PVC, PE, nylon, thermoplastic elastomers, and other materials

Water Solutions

Accu-Tab® Chlorination System: Used to sanitize water for drinking, food safety, agriculture, industrial, power generation and recreational

Stone Roofing

Westlake's Unified Steel® Stone Coated Roofing: Awarded by *Green Builder* magazine as a "2023 Sustainable Product of the Year"

Exterior Siding

TruExterior® Siding: Incorporates minimum of 70% pre-consumer recycled fly ash content—a byproduct of coal power generation—into its polyash technology, diverting waste from landfills and producing durable, wood-like exterior building materials

Pipe & Fittings

Molecular-Oriented PVC: 40% less pipe weight and more durable than conventional PVC pipe

PVC

GreenVin® PVC and GreenVin® Caustic Soda: Produced with renewable energy under European Guarantees of Origin

Vinyl Siding

Foundry® Siding: Durable multi-layered vinyl cladding made with PIR

Compounds

Pivotal® PVC Compounds: Formulated with post-industrial recycled content

Polyethylene

Pivotal® One-Pellet Solution: Green Circle Certified for post-consumer recycled content

Epoxy

Azures™: Free of any REACH substance of very high concern (SVHC)

Communications
to Engage
Constituencies

Philanthropy: In 2023, Westlake in Florida, Kentucky, Louisiana, Texas and West Virginia donated approximately \$1.6 million to the United Way or similar local agency.

Scholarships: For the 27th consecutive year, Westlake provided scholarships to high-achieving college-bound students of employees in the U.S. and Canada.

Community Outreach: Westlake employees across the globe regularly volunteer their time to make a positive difference in their communities. Once a year, employees world-wide participate in Westlake's Global Service Month.

Since its inception, the Westlake Warriors cycling team has raised over \$131,000 for the MS 150 event.

In Rotterdam, the Netherlands, Westlake Epoxy team members partnered with the Amsterdam based organization Plastic Whale to clear the Hoek van Holland beach of plastic waste and other litter.
